Welcome To King Frog News

We will endeavour to provide a specialist service and information base for all organisations wanting information and solutions to a multitude of problems that can be handled environmentally. This year has been a particularly successful one with more and more companies using our expertise in the field of Hygiene and Safety.

If you have a problem and need a solution, and our trained staff will provide the solution. We challenge anyone to give us a problem we can not solve in our field of expertise.

First Aid Kits

Trafalgar First Aid Kits are available in the motor vehicle packs and outdoor camping packs for just \$19.95.

FIRE BLANKET SALES INCREASE 220%, sales of the Australian Standard approved flamestop fire blanket increased dramatically this year and these inexpensive 1 metre x 1 metre blankets are available for the special price of \$14.95 (a saving price of \$15.00) this summer to all our valued customers.

Place your order next time you order products.

Thumbs Up Award

This years charity focus the variety club xmas party for disadvantaged children and the kidsafe program.

Some local businesses owners in the ramsgate area were asked to sponsor a child for xmas and thumbs up we raised several thousand dollars, for the kids.

Congratulations goes to Ian Jones for his individual effort in getting out there and just doin it kidsafe also was given several thousand dollars of product to raise money for the kidsafe program.

NEW PRODUCT RELEASES

ENVIRO CHEMICALS

Our unique citrus cleaners and essention oil disinfectants are now available to the public in convenient 1 litre concentrate packs now at \$10.00 per litre. Remember this is equivalent to 50 litres of general supermarket products.

Trivia – Fly Power Facts

There are 120,000 types of flies.
Flies carry no less than 1,941,000 bacteria.
Flies are responsible for more deaths than any other perceived atrocities.
The average fly lives 21 days.
Their wings beat 200 times a second.
Flies don't grow they are born full size.
Flies jump up and backwards when taking off.
The average speed of a fly is 4.5 mph.
Flies smell with their antennae.
Flies will only beat their wing as long as their feet are free.
Flies wings are attached to their eyes internally.

ENVIRONMENTAL AWARD

2 Day FM Word On The Environment Award

Managing Director, Ian Jones has developed a world first pollution control system for sewage removal trucks and has been accepted in the awards for his contribution to saving the environment.

See next page for details.

Rats, Mice & Cockroaches !

The season for rodents has come early this year with reports that mice populations are growing rapidly in NSW and QLD.

The weather conditions are favourable for the mice with rain and sunshine offering much healthier feeding for the tiny rodents. Rain provides a plentiful water supply and extra grass and crops provide extra food and cover.

Remember rats produce 8 - 12 babies every 3 weeks and mice 4 - 6. The average life span is 1 year and they can wean 20 - 40 young each.

Did You Know ?

Rats and mice can live in the same structure due to their different lifestyles.

Rats can jump up 3 feet and drop 50 feet without serious injury and if they cant get over or around they will gnaw through.

Lead, cinder block, aluminium, glass and improperly cured concrete are just a few of the materials Rodents are know to penetrate.

PEST FREE PLUG IN

Is the solution in more ways than one. The pest free plug in is an electronic device that changes the existing electro magnetic field in your electrical wiring that in turn effects their metabolism and sleeping habits. Put simply it drives them crazy 24 hours a day 7 days a week.

So they just move out. We have hundreds of success stories including some coles supermarket stores and schools proving that Pest Free replaces conventional spraying by Pest Control Companies.

The units have a money back guarantee and are a sure way to rid your premises from these pesky vermin. Over 1,000,000 units sold speaks for itself.
